Straddling the eastern edge of the Kaibab Plateau, the **Saddle Mountain Wilderness** is a rugged land of narrow drainage bottoms and steep scarps (a line of cliffs produced by faulting or erosion). The gentle slopes on the main ridge of the area drop dramatically

to form the Nankoweap Rim on the south. Elevations range from about 6,000 feet on Marble Canyon Rim to 8,000 feet on Saddle Mountain itself, a prominent ridge with a profile that resembles a saddle, horn and all.
